

User's Quick Guide for Bluetooth Car Kit

Step 1

Insert this car kit into the cigarette lighter power plug inside your car. The car kit is powered up and standby every time when car engine is started.

Step 2

Press function key 3 seconds for shutting off power (a short beep) and let go. Then press function key about 6 seconds, first short beep then a long beep. Car kit is now under pairing mode.

Step 3

Turn on **Bluetooth** mode on your mobile phone and do searching car kit.

Step 4

During searching and bonding procedure, your mobile phone will ask for a passkey to link the car kit. Please enter **9999**
