BN608 BLUETOOTH CAR KIT

- (1) Multifunction Button (MFB)
- (2) Volume Key +
- (3) Volume Key -
- (4) Microphone

NOTES:

1. This BT Car Kit provided with 2 microphones(one mini microphone and another one with the extension cable)

2. The purpose of microphone with extension cable is not only to get the best voice signal but also to provide the convenience to talk for people on the back seats.

3. The purpose of mini microphone makes the Bluetooth wireless technology more enjoyable.

4. "Pairing" means to create a link between bluetooth car kit and bluetooth mobile phone. You should pair BN608 car kit with your mobile phone before using it. And you only can use the paired mobile phone once paired. If you want to make it work with other different mobile phone, you need to pair it with the other new mobile phone. Thus the car kit will not work with the previous paired phone at the same time.

PAIRING THE CAR KIT

1. Press the MFB button for 5 seconds until you hear the pairing beep and

- see the LED light in durative blue color .
2. Release the MFB button, car kit is on the pairing mode.
 3. Turn on the mobile phone, and keep it within 10 meters away from the car kit.
 4. Perform a device discovery from the phone
For details on device discovery for your phone, refer to the phone's user's guide.
When the scan is completed, the phone displays the devices found.
 5. Select the BN608 from the discovered devices list and confirm following the screen prompts.
 6. When prompted by the phone, please enter the passkey 0000. Pairing is successful when the car kit indicator LED flashes blue color every 3 seconds. And now the car kit standby mode is ready for any call dialing or coming.

CANCELING PAIRING MODE

When you are using the pairing mode, you can cancel the pairing mode and turn off the car kit, according to the following step:
Press the MFB button for 3 seconds until the two LED lights turn out. Meanwhile, you can hear the turning off beep.

PUT THE BN608 CAR KIT IN A PROPER PLACE

Put the BN608 car kit in a proper place and find the best angle, making the microphone face to the mouth. The best talking distance is 30+/-5cm. If you feel the voice too low or too loud, please try to adjust the volume key+ or Key -.
